

1.75mm PLA (1kg) - Sky Blue

SKU: FIT0292-SB

INTRODUCTION

PLA is one of the most environmental-friendly 3D printing material with a wide range of colors.

Polylactic acid or polylactide (PLA) is a thermoplastic aliphatic polyester derived from renewable resources, such as corn starch, tapioca roots, chips or starch, or sugarcane. It can biodegrade under certain conditions.

For this material, it is suggested to be used between 215°C to 225°C. Test is necessary to find the best temperature for printing.
