

Flotilla - Slider

PIM037

The Slider module is a slide potentiometer which has five bright white LEDs that illuminate as the slider is moved. It's perfect for using as a synth controller or for controlling the speed of your robot.

Features:

- Slide potentiometer
- Five bright white LEDs
- Micro USB connector

Find Flotilla Cookbook recipes that use the Slider module at <http://learn.flotil.la/cookbook/> or use Slider with Rockpool at <http://flotil.la/rockpool/>

Or use our Python Flotilla API to control the Slider module.

Note: Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
